Flight maneuvers that are initially taught to pilots are designed to be basic and relatively simple: straight-and-level, turns, climbs and descents. However, as a pilot continues through their flight training, additional maneuvers are needed to develop beyond the fundamentals. Performance maneuvers

CONTENTS Airport operations

Basic fighter maneuvers (BFM) are tactical movements performed by fighter aircraft during air combat maneuvering (also called ACM, or dogfighting), to gain a positional advantage over the opponent. BFM combines the fundamentals of aerodynamic flight and the geometry of pursuit, with the physics of managing the aircraft's energy-to-weight ratio, called its specific energy.

Basic fighter maneuvers - Wikipedia

This manual should be used as a reference for approximate power settings and Leading Edge Aviation standard procedures.

Adjustments in suggested power settings may be required to attain desired speeds.

This manual should be used for training purposes only and final authority will be with the Pilot in Command.

This maneuvers manual helps pilots visualize concepts learned in flight training and incorporate the Practical Test Standards into every maneuver. The full-color illustrations and textual explanations work in conjunction with an instructor ' s lessons, and facilitate effective preflight and postflight briefings.
